

STATUTE

INTERNATIONAL KICKBOXING UNION K . I . U

In other words, the athlete defines her goal at the very beginning that I want to become a champion and show the world the strength, will and ability of myself and my country. In other words, the athlete defines her goal at the very beginning that I want to become a champion and show the world the strength, will and ability of myself and my country. This idea will remain in the athlete's mind until she reaches the championship, but after reaching her goal, she will see all the difficulties and hardships on the way as easy. There are some people in the society who choose the awareness of the new generation and the acquisition of high human values as their goal. There are a large number of such people in different countries as well as in our country, Iran, who have served their country in the way of science and technology, culture, art and sports. They have even given their lives to serve humanity. For example, in our country, Dr. Shariati spent his life informing the young generation and he died until the end of reaching his goals and joined the group of thinkers and enlightened people. There are other people whose lives have been spent in the way of the freedom of mankind and the country, whose name will always be immortal. Therefore, according to the efforts of scientists, leaders and inventors to improve human life who have worked hard for years and have reached their goals, the inventor and founder of the International Kickboxing KIU Union has tried to achieve his goal of providing a method and A solution for the development of mental and physical health, the expansion of communication between federations, associations and organizations, the creation of unity and empathy among the great masters of the world, and the provision of better services to martial arts athletes and heroes. The young generation of societies will be able to achieve their hopes by relying on the solutions and laws created in this union. That is why the founder of the sports giants will encourage

countries to insure coaches and champions so that teenagers and young health. In this regard, trying to consider coaching as a job will have a positive result. Those who have brilliant talent and are in need of financial means should do humanitarian measures by developing relations between sports federations and organizations to participate in international and global competitions and their technical and scientific advancement. Although it is obvious that there is a long way to reach the goal, but with the help of thinkers, great professors, heads of non-governmental organizations and charities, and popular and caring athletes, it will definitely reach its goals. This union, with the help of the great amateur karate union IAKU located in Argentina, will open a way for itself among sports federations and organizations, which few people have thought about until this time. A bigger goal that is pursued in this union is to make martial arts scientific and the scientific excellence of teachers in the world. Still in many countries, people see martial arts as entertainment, but with our growing trend, in the near future, we will see scientific capabilities and Technically, we will be masters of martial arts in the world. Focusing on the great strengths of the professors, this union will strive to introduce and stabilize them in global forums. In this way, we will be able to achieve our goals.

The founder Paragraph 1. Name:

International Kickboxing Union K.I.U

Paragraph 2, subject:

- A- Teaching martial arts among children, teenagers, young people and adults.
- B- The creation of educational centers around the world by the representatives of the union
- C- Establishing representation in different countries for the development and expansion of martial arts
- D- Developing and motivating physically and mentally among champions and coaches of this union is the grand master – Dr. Gholam Reza Naghdi . He was born in 1983 in IRAN – East Azarbaijan province,

TABRIZ city in a religious and ordinary family . He started practicing martial arts since elementary school. He started karate at the very beginning and after years of research, study and practice, he was able to create the martial art of JOKAY KUNG FU in 1983 , even though he had only learned karate until then. After that, he started teaching this martial art in Tabriz city. As its name suggests, it consists of (softening and yoga exercises) some judo and karate techniques. Thus, with the help of his wife, in 2012, the teacher registered and established the Jokay Kung Fu Institute in order to legally serve the country's sports community. In 1365/1985 , the teacher wrote her first book titled ZEN in the Martial Art of Jukai, but due to its similarity to Kung Fu Toa, a completely Iranian martial art, it was not allowed to be published by the Ministry of Guidance. With the spread of addiction and opioids, the human need to expand sports is felt more so that teenagers and young people can fill their free time by playing and attending clubs, and this is considered an excellent solution for expanding sports and health and preventing delinquency. Therefore, let's help each other to think more about our next generation and we know that the future makers are the youth of every country. Many thanks to the officials of TAK International Union, all the masters and pioneers of martial arts who have helped us in this vital matter and have chosen to serve their fellow man as their way and have achieved the slogan that there is no religion better than humanity.
